Qualifications are the key to tomorrow's success

SDL MultiTerm 2009 – Course for translators

SDL MultiTerm 2009 Desktop is the desktop terminology management solution from SDL.

This course is designed to give you an excellent understanding of the features and functions in SDL Trados MultiTerm 2009 for managing clients' terminology. It also shows how the power of this application can be enhanced in the translation environment through integration with SDL Trados Studio 2009.

The course is held in small groups, with a maximum of 8 participants. This course is part of the official SDL Trados training programme.

Course content

- * Term-oriented terminology databases
- * Overview of the program interface
- * Standard search options
- * Functions for editing
- * Converting Excel glossaries
- * User profiles
- * Integration in SDL Trados Studio 2009

After completing the course, you can build on the knowledge you have acquired in the training room by trying out examples of your own.

Target group

The seminar is aimed at users who have basic knowledge in terminology management. In-depth knowledge of SDL Trados Studio 2009, corresponding to Certification Level 2 (SDL Trados "Intermediate" training), is an advantage.

Tutor

John Mercer
